

Decolonising Global Health: What Does It Mean For Asia?

Calls to decolonise the field of global health have helped to shine a light on the power structures and inequities within global health and highlighted the need to increase genuine representation and involvement of marginalised voices. This webinar will bring together leaders from institutions across Asia to examine the evolving discourse around decolonising global health, the role of educational institutions, and ways in which Asia can help 'decolonise' global health within and beyond the region.
